High Performance, Outstanding Value for Production Capture

Features:

- Scan speeds up to 130 ppm / 260 ipm
- 100,000-page daily duty cycle
- 500-page adjustable input tray*
- High resolution color LCD
- Visioneer® OneTouch, Capture SE** and Organizer AI** applications
- On-Board Acuity Hardware Image Processing
- Kofax® Certified Driver
- Cerner Validated
- TAA, EPEAT™, and EnergyStar® Compliant
- Available Imprinter model

*20 lb., 75-90 g/m² paper

** English only

TOUGH TECHNOLOGY CHOICES

In the era of cloud-based hybrid and remote work environments, production scanners are becoming a vital tool in bringing archives and records online. Document managers in financial services, law firms, healthcare providers and payers, and especially governments are facing difficult choices around the right production capture technology options. As speeds increase, prices rise exponentially, and the full cost of operation are making these decisions a major financial commitment. Customers are looking for price-performance, low cost of ownership, latest technology, and peace of mind.

PRICE-PERFORMANCE PACKAGE

The Xerox® W130 production scanner delivers leadership price-performance value. With the price of a lower productivity production scanner, the W130 Scanner offers highperformance speeds up to 130 ppm / 260 ipm. A current-state hardware platform provides a daily duty cycle of 100,000 pages per day and handles documents ranging from hard cards to A3 paper, even long documents up to 236 inches (5994 mm). An adjustable, motorized 500-sheet input tray feeds jobs through a

u-turn paper path or for thicker stock and cards, a straight paper path is also provided. A high-resolution color LCD makes it easy for operators to change scan and workflow settings.

PRODUCTIVITY IS A PLATFORM

Xerox® W130 Scanner is built for productivity. Award-winning "reversing rollers" technology and a multiple-motor paper path keep misfeeds to a minimum. Three ultrasonic sensors provide double-feed skip (DFD) functionality across incoming pages, and staple detection is built-in. On the software side, the W130 is equipped with the Visioneer® Intelligent Software Platform, including Visioneer® OneTouch®, Capture SE, and Organizer AI. Up to 20 customizable OneTouch workflows are presented on the LED display to get jobs started at the touch of a button. An exceptional OCR solution rounds out the software offering.

QUALITY IMAGES AT FULL SPEED

Documents going to the cloud and OCR applications require precise, flexible image quality controls. The W130 achieves this with a dual-lamp LED lightbar to provide consistent, bright light across the page. Visioneer Acuity

Intelligent Image Processing provides more than 25 imaging features, configured through the accessible TWAIN™ DriverPLUS user interface, and built into OneTouch and Capture SE applications. The W130 Scanner delivers full-rated speeds by removing bottlenecks end-to-end. Visioneer OnBoard Acuity handles 7 image-processing tasks in hardware, USB 3.1 Gen 1 provides a fast pipeline to the PC, and the proprietary Acuity PC optimization finishes the scan on the PC by using available CPU cores and main memory.

COVERAGE AND FLEXIBILITY

The Xerox® W130 includes a solid standard manufacturer's warranty out of the box as well as a range of additional service options. A W130 Imprinter model is also available to add characters and tags to scans. The Xerox® DocuMate® 4700 A3 flatbed can be easily tethered to the W130 Scanner for special documents. Finally, our Proprietary Parallel Scanning technology allows multiple W130 scanners to scan concurrently to a single PC, fundamentally changing the economics of ultra-high-speed production capture.

VISIONEER INTELLIGENT SOFTWARE PLATFORM FOR WINDOWS

OneTouch

An easy-to-use scanner workflow application that performs all steps in a complex scanning operation at the touch of a button.

Acuity

Enables you to improve the visual clarity of scans. Acuity uses over 25 advanced algorithms to intelligently correct documents.

Capture SE*

Flexible, powerful batch scanning solution that can split scans into separate files, create indexes, read barcodes and extract data.

DriverPLUS

Provides an impressive array of settings to enable precise scan customization with a simple-to-use interface and helpful tool tips.

Organizer AI*

Manages your files with fast search, conversion, file analysis and cleanup, tagging, PDF editor and automated file classification
