

Scanner

The Xerox 2400 is perfect for the home or small office user who wants a fast and easy to use scanner for capturing images, photos and documents. First time users love it because of its ease of use – just press a One Touch button and get the perfect results on everyday scanning tasks. Advanced users love the powerful features of the Scan Manager Pro driver, ScanSoft's PaperPort Deluxe and Ulead PhotoExpress. The Xerox 2400 has everything you need to correct poor quality originals or to enhance images with artistic and creative effects.

Outstanding Value

When the high performance and quality of the Xerox 2400 is combined with the award-winning software packages you have the ultimate scanning solution at outstanding value for money.

- **Revolutionary One Touch Technology**
- **USB Plug & Play Installation**
- **1200 x 4800 dpi Optical Resolution**
- **48-bit True Colour**
- **Lightning Fast Scans**

Precision Image Quality – 1200 x 4800 dpi Optical Resolution eliminates jagged edges and captures the finest detail from your original. That's enough resolution to turn a 6" x 4" photo into a 24" x 16" image with no loss of detail.

48-bit Colour – 48-bit scanners capture more colour than their 42-bit predecessors with a total of over 281 trillion colours, you get brighter yellows, richer reds, cooler blues and everything in between.

Speed – With its revolutionary FlashBack Bi-directional AutoScan Technology, the Xerox 2400 is fast: the scanner moves one way to pre-scan the image area quickly, automatically crops to the edges of the photo then reverses direction and performs the final high resolution scan on the return trip.

Simplicity – Our revolutionary One Touch technology simplifies the way people use scanners, so you can get great results within minutes of opening the box. The scanner has five One Touch buttons, four of which are pre-configured, allowing you to send scanned images straight to PaperPort for editing, email, OCR for editing text or a printer. The fifth button is the Custom button and can be programmed to send a scanned image to any image, text, fax or print application.

Award Winning Software

PaperPort Deluxe – the world's best-selling document and image management application creates thumbnails of everything you scan allowing easy filing in colour-coded folders. PaperPort works with most popular applications. Simply drag and drop a thumbnail onto the link icon and your document is on its way to that application!

TextBridge – PaperPort's built-in TextBridge OCR engine automatically converts typed or printed documents into editable documents

and sends them to your word processor. You'll never have to retype a text document that you wish to edit.

Ulead PhotoExpress – PhotoExpress gives you powerful yet easy-to-use editing tools to personalise your favourite photos in no time. Create impressive greetings cards, calendars, web pages and much more with just a few clicks, then send them to friends & family or share them on the Internet.

Scan Manager Pro Driver

- Image adjustments automatically update in configuration window
- Use preset configurations or save your own custom configurations for later use
- View image dimension, file size and empty drive space information before scanning
- Batch scan from single or multiple originals by drawing multiple cropping boxes
- Choose each batch scan by tab to modify settings

COMPATIBLE WITH:	
Windows 98	✓
Windows 2000	✓
Windows ME	✓
Windows XP	✓

Product Specifications:

Optical Resolution:	1200 x 4800 dpi
Hardware Supersampling Resolution:	4800 dpi
Enhanced Resolution (interpolated):	4800 dpi
Scanner Bit Depth (colour):	48-bit internal (over 281 trillion colours)
Scanner Bit Depth (greyscale):	16-bit internal (65,536 shades of grey)
Scanning Area:	Up to 216mm x 297mm (A4/letter) (8.5" x 11.69")
Scan Method:	Fast single pass with FlashBack AutoScan
Interface:	USB
Driver:	Scan Manager Pro
Light Source:	Cold Cathode Fluorescent Lamp
Dimensions:	432mm x 302mm x 66mm (17" x 11.9" x 2.6")
Weight:	2.32 kg (5.1lb)
Part No:	90-8002-200
Barcode:	4711860800223

Installation Instructions in 12 European languages

Operation in English, French, German, Spanish and Italian

Minimum System Requirements:

- Pentium equivalent processor or higher
- Requires Windows 98/2000/Millennium/XP
- 64MB of RAM (128MB for Windows XP)
- 160MB of free Hard Disk space
- CD-ROM drive
- Colour monitor
- USB port
