OVERCOME YOUR FEAR OF DIFFICULT DOCUMENTS

Versatility, high-speed and superior reliability make the DocuMate 4799 a powerful scanner for demanding environments. With up to a 40,000 page per day duty cycle, this innovative workhorse scans up to 112 pages per minute and employs three advanced sensor systems: ultrasonic double feed detection, stapled document detection and intelligent feed control to ensure that your scan job will not get interrupted.

Documents of various sizes can be stacked together in the automatic feed tray without worry because the DocuMate 4799 employs not one, but three ultrasonic double feed detection sensors to cover the entire width of a document. The scanner has another set of sensors designed to detect staples anywhere in a document. As soon as a staple is detected, the scanning process is halted—minimizing damage to the optical glass and your documents. A third set of sensors constantly monitors the thickness of documents

being fed into the scanner and automatically adjusts the roller pressure to ensure that all pages are accurately fed. This combination of sensors creates one of the most reliable feed mechanisms available today.

Up to 350 mix-sized documents can be stacked in the center of the automatic feeder. There is no need to organize documents according to their size, so scanning is fast, easy and efficient. A pre- and post-scan imprinter is also available for the DocuMate 4799 and is supported through the included TWAIN™ and ISIS® drivers.

ADVANCED IMAGE PROCESSING TECHNOLOGY

The DocuMate 4799 provides both high quality image enhancement and increased productivity with Kofax® VRS™ Professional AIPE-EBC for auto-everything scanning, including Auto Rotation, Blank Page Deletion and Auto Colour Detect. VRS Professional improves your workflow and reduces the total time needed to scan even the largest volumes of mixed batch documents.

Taken together, the DocuMate 4799 and the Kofax VRS Professional bundle translate into real and measurable savings—fewer manual steps, reduced storage requirements and less operator intervention.

When the occasional paper jam happens, the DocuMate 4799 is very easy to maintain. Its unique “clamshell” design allows full access to the entire paper path, so you can clear paper jams or clean the unit without calling a service technician. The rollers are easy to replace, improving the unit’s cost effectiveness, and have a long service life.

Designed for document capture and workflow the DocuMate 4799 is everything you ever wanted in a high-speed document scanner: productivity, reliability and innovation.
