

Add distinct characters and tags to your scanned documents.

XEROX® IMPRINTER SCANNER ACCESSORY
FOR DOCUMATE® 4799 AND 6710

By installing the optional imprinter kit into the scanner, the user has the ability to print specific characters on to the document before or after scanning, depending on the scanner model. By printing serial numbers, the scanned data can be tracked, matched and/or indexed with the original document. The printed characters are read as front side image and function as pre-imprinter (front face of document only) for the Xerox® DocuMate® 6710, and pre- and/or post-imprinter (front/back side of document) for the DocuMate 4799.

Imprinter Specifications	
Product Name	Imprinter Kit
Model Number	SKU: 765IMP-KIT, Xerox P/N: 003R98811
Print technology	Inkjet Method using Pulse Control
Print Head matrix	12 Nozzles
Life expectancy (16 dots / character standard font)	Approximately 6 million characters
Speed	Dependent on scanner speed

Ink Jet Cartridge Specifications	
Dryness time	0.4 sec @ 23° C and 50% RH
Contact pads	Gold plated
Number of contact pads	12 (Corresponds to nozzle number)
Life span (unsealed)	6 months @ 23° C
Preservation Period (sealed)	24 Months
Extreme preservation temperature for 48 hours	-30° C (Min), 60° C (Max)
Total life span	30 months

Environmental Conditions	
Nozzle distance	0.5 mm (Min), 1.0 mm (Typical), 1.5 mm (Max)
Temperature guidelines	10° C (Min), 23° C (Normal), 40° C (Max)
Humidity (@10° - 23° C)	10% RH (Min), 90% RH (Max)
Humidity (@10° - 40° C)	10% RH (Min), 50% RH (Max)
Operational Altitude (@23°)	Maximum 3000 m
